

GreenNet evidence: learned axial Green-kernel structure

Fixed- η slice at $\eta=0.50$

Line plot of $G(t, \eta_0)$ versus t for a fixed $\eta = 0.50$. The x-axis is t (0 to 1) and the y-axis is $G(t, \eta_0)$ (0 to 0.25). A vertical dashed line is at $t = 0.50$. The plot shows two curves: a dashed orange line for the reference and a solid teal line for the learned kernel. Both curves are nearly identical, peaking at $G \approx 0.25$ when $t = 0.50$.

Diagnostic	Value
η	0.50
Kernel rel. L2	1.11%
Slice rel. L2	0.92%
Diagonal band	$ t-\eta \leq 5/128 = 0.0391$
Error mass / band area	9.5% / 8.3%
Mean error / off-band mean	1.16x
